Novel carboxylic acid derivatives, their preparation and use

Abstract

Carboxylic acid derivatives

$$R = Z - \frac{R^4}{C - CH - Y} - \frac{N}{N} = \frac{R^2}{N}$$

$$R = \frac{1}{R^5} = \frac{1}{R}$$

$$R = \frac{1}{N}$$

$$R = \frac{1}{N}$$

where $R-R^6$, X, Y and Z have the meanings stated in the description, and the preparation thereof, are described. The novel compounds are suitable for controlling diseases.
